

The Newhaven Enterprise Gateway

The Newhaven Enterprise Gateway has been set up to provide a complete range of services and support for entrepreneurs and young companies in this area. We can help companies gain access to training, business advice, local mentors, funding, new contacts and business networks as well as giving them friendly local advice.

What is an Enterprise Gateway?

An Enterprise Gateway is a network of people and organisations that come together to provide a complete range of services and support for entrepreneurs and young companies. Enterprise Gateways can help people with everything they need to set up or enhance their own business and play an essential role in developing the local economy.

Who is eligible for support?

The Newhaven Enterprise Gateway will support entrepreneurs, pre-starts, start-ups, and young businesses, particularly in areas in need of regeneration. These may be from any industry sector and will include locally trading businesses, lifestyle businesses, social enterprises, not-for-profit businesses and groups currently under-represented in business.

What is the background to the Enterprise Gateway initiative?

Enterprise Gateways are a new initiative developed jointly by the South East England Development Agency (SEEDA) and the South East Business Links. SEEDA is planning to open 20 Enterprise Gateways in the South East by 2007. At the heart of each Enterprise Gateway will be a business centre offering business advice, access to incubation space and a link to the wide range of support services.

What does the Newhaven Enterprise Gateway want to achieve?

- To increase the number of business start-ups
- Improve the survival rates of new businesses
- Nurture entrepreneurship and innovation
- Make a positive impact on the local economy
