

The Newhaven Enterprise Gateway

The Newhaven Enterprise Gateway has been set up to provide a complete range of services and support for entrepreneurs and early-stage businesses in this area. We can help you gain access to training, business advice, local mentors, funding, new contacts and business networks as well as giving you friendly local advice.

What is an Enterprise Gateway?

An Enterprise Gateway is a network of people and organisations that come together to provide a complete range of services and support for entrepreneurs and early-stage businesses. Enterprise Gateways can help people with everything they need to set up or enhance their own business and play an essential role in developing the local economy.

Who is eligible for support?

The Newhaven Enterprise Gateway supports entrepreneurs, pre-starts, start-ups, and early-stage businesses, particularly in areas in need of regeneration. These may be from any industry sector and will include locally trading businesses, lifestyle businesses, social enterprises, not-for-profit businesses and groups currently under-represented in business.

Women friendly support and advice

We can provide access to women business advisors and can also provide financial and practical support for childcare and travel. We also run a wide range of courses for women who are thinking of working for themselves or starting a business.

What is the background to the Enterprise Gateway initiative?

Enterprise Gateways are a new initiative developed jointly by the South East England Development Agency (SEEDA) and the South East Business Links. SEEDA is planning to open 20

Enterprise Gateways in the South East by 2007.
